"FREE YA HOOD"

Another Friday film screening about community, dignity, autonomy and resistance. In addition to the inspiring words and experiences of people's struggles for self-determination, the films expose strategies of repression that always increase in response to peoples' power. We invite engaged discussion after each screening, learning from each other as we apply the lessons generated from each of the community struggles featured in the films.

This week's film honors the work of the FREE YOUR HOOD COALITION:

“An organizing platform for people of color who are doing work against Police Brutality and the Prison/Military Industrial Complex. In short we are tired of seeing our brothers and sisters swallowed up by this system -so they can use our labor and bomb more innocent people. WE AIN'T HAVIN IT!!!!!! FREE YOUR HOOD began in 2004 at the close of a police brutality trial that involved members of Dead Prez and The A-Alikes. There was a tangible sense of frustration with the legal process and a desire to organize for change.”
